SCENARIO

Exploring, analyzing, and understanding housing market trends using interactive Tableau dashboards and visualizations.

	Entice	Enter	Engage	Exit	Extend
	How does someone initially become aware of this process?	What do people experience as they begin the process?	In the core moments in the process, what happens?	What do people typically experience as the process finishes?	What happens after the experience is over?
Steps What does the person (or group) typically experience?	**Receive housing dataset for academic project, research, or analysis purposes.**	**Load dataset into Tableau Desktop and explore available data fields.**	**Load dataset into Tableau Desktop and explore available data fields.**	**Finalize dashboards, verify visualizations, and publish dashboard to Tableau Public.**	**Load dataset into Tableau Desktop and explore available data fields.**
Interactions What interactions do they have at each step along the way? - **People:** Who do they see or talk to? - **Places:** Where are they? - **Things:** What digital touchpoints or physical objects would they use?	**Things:** Dataset file (CSV), project documentation, computer system **Places:** Academic lab, home, or workplace **People:** Students, instructors, analysts, or project team members	**Things:** Tableau Desktop software, dataset file **Places:** Computer workstation **People:** Student, analyst, or project developer	**Things:** Tableau dashboards, charts, filters, visualization tools **Places:** Tableau Desktop interface **People:** Student, analyst, or instructor	**Things:** Tableau Public platform, published dashboard link **Places:** Web browser **People:** Student, evaluator, instructor	**Things:** Tableau Public dashboard, Flask web interface, browser **Places:** Web environment **People:** Stakeholders, instructors, project evaluators
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	**Help me understand the dataset and begin the housing market analysis.**	**Help me explore and understand housing data clearly.**	**Help me identify patterns, trends, and relationships in housing data.**	**Help me share my analysis and present findings clearly.**	**Help me demonstrate and extend the project for academic and analytical purposes.**
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	**Opportunity to work on real-world housing data.**	**Tableau automatically organizes data into dimensions and measures.**	**Interactive dashboards provide meaningful insights.**	**Successful publishing and viewing dashboard online.**	**Dashboard successfully integrated into web application.**
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	**Initial confusion about dataset structure and meaning of columns.**	**Difficulty selecting appropriate fields for visualization.**	**Trial and error while selecting appropriate chart types.**	**Minor adjustments required for layout and formatting.**	**Learning curve in embedding dashboard into web interface.**
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	**Provide dataset description and column explanations to simplify understanding.**	**Provide training or guidance on using Tableau features effectively.**	**Improve visualization selection and dashboard design practices.**	**Improve dashboard clarity and usability before publishing.**	**Enhance dashboard with additional datasets, filters, and advanced analytics features.**
